

NAME:

Logging onto the CS Lab Computers

0. Wake-up or turn-on any lab computer. The machines are networked so you can use any on any day.
1. Log on using the default password: the word "union" followed by your ID number e.g., union12345
2. Change your password:
 - open a terminal (Ctrl-Alt-t or right click on the Desktop background and select terminal option)
 - type: yppasswd
 - note that you will see nothing as you are typing in your old and new passwords
 - *be sure to keep track of your new password*
3. Create a folder for this course e.g. named csc106
4. Inside this folder create a folder for this week or create folders for this class e.g. named week1
5. Never ever, ever work on files in the Downloads folder.
 - when you download a file and it ends up in the Downloads folder, move it to your course folder — only then work with it
6. Log off (top right corner of the screen) and on again to test your new password.
7. **Always log off before leaving the lab.**
